### **“Daddy’s Boys” Play Feedback and Comments**

- Awesome play. Very good portrayal of relationship dynamics between father, son & friends, women and men. Provided great insight and knowledge about detection, screening and awareness.
- Enjoyed the play and the message, don't change a thing.
- Great play, I love all the song's and everything else. I can't wait for another play.
- It was nice to see there was a play to come out that was focused on men and especially black men. Play was very encouraging and inspirational, very educational play for all to see. Loved the play.
- I really enjoyed the play. This is an issue that needs to be taught to the African American community.
- Lots of good messages in this play! Fantastic job
- Information on the new clinical trials was good. I didn't know the stats in different races.
- I enjoyed the show. It certainly delivered a positive message and brought awareness to others.
- This play is excellent. Will share this play. Needs to be seen at more schools, colleges and auditoriums
- Thank you for the fabulous entertainment and the profound information about prostate. Communicating all this to my four brothers.
- Wonderful and interesting play on prostate cancer. I will tell others about Daddy's Boys. Very good play.
- Delightful play - informative and definitely entertaining. Wonderful singing!!
- Great play, educational, informative, and very entertaining. Thank you. will look forward to more.
- Great job emphasizing PHEN & 1 in 5 black men.
- I would like others to see this wonderful and marvelous play. Enjoyed it very much.
- The play highlights an uncomfortable subject which is always powerful.
- I am an oncology provider & the majority of my patients have prostate cancer. This play was an excellent source of information & entertainment!!
- My little cousin (age 10) came to the play with his grandparents. When he got home, his mom called to tell me that he came back home eager to tell his dad about prostate cancer. He said, “I have to tell Dad about prostate cancer because a lot of black men get it, but they don’t always get checked or talk about it, so I have to tell him.”
